

Revision: 000

Date: 30th January 2004

## 1. IDENTIFICATION OF THE SUBSTANCE AND COMPANY UNDERTAKING

General Chemical Name Tungsten(VI)-oxide

Intended or recommended uses of substance: Research & Chemical production.

Supplier (Distributor) New Metals & Chemicals Ltd  
Newmet House, Rue de St. Lawrence  
Waltham Abbey, Essex, EN9 1PF  
Telephone: +44(0) 1992 711111

## 2. COMPOSITION/INFORMATION ON INGREDIENTS

Ingredient name	Concentration /range	*Classification	CAS No	EINECS No
Tungsten(VI)-oxide	100%	Xn: R20/21/22 Xi: R36/37/38	1314-35-8	215-231-4

\*see 16. OTHER INFORMATION for full text of R-phrases

## 3. HAZARD IDENTIFICATION

This product is harmful by inhalation, in contact with skin and if swallowed.  
It is irritating to the eyes, mucous membranes and skin.

## 4. FIRST AID MEASURES

Inhalation Move the patient to fresh air and administer 100 percent humidified supplemental oxygen with assisted ventilation as

required. If breathing has ceased DO NOT use mouth-to-mouth respiration apply artificial respiration using oxygen and a suitable mechanical device such as a bag and a mask. Seek immediate medical attention.

Skin Contact	Flush skin with copious quantities of water. Remove and destroy all contaminated clothing and shoes. Seek immediate medical attention.
Eye Contact	DO NOT allow patient to rub or keep eyes closed. Irrigate with copious quantities of water for at least 15 minutes. Flush under eyelids by lifting lid. DO NOT use a static eye bath. Seek immediate medical attention.
Ingestion	DO NOT induce vomiting. If patient is conscious and alert, wash out mouth with water. Give nothing by mouth if patient is unconscious. Seek immediate medical attention.

Note: Ensure that medical personnel are aware of the material involved, and take precautions to protect themselves.

## **5. FIRE FIGHTING MEASURES**

Precautions against fire and explosion

Not flammable

Suitable extinguishing media

Use fire fighting measures that suit the environment i.e. water.

Extinguishing media which must not be used for safety reasons

N/A

Special exposure hazards arising from the substance itself and its combustion products - including any gaseous by-products

Avoid exposure to material in dust , vapour or mist form.

Special protective equipment for fire fighters

Wear self-contained breathing apparatus and full chemical protective clothing. Decontamination must follow before removal of gear.

Show documents to the emergency services.

## **6. ACCIDENTAL RELEASE MEASURES**

### Personal Precautions

Evacuate all but essential authorised control personnel. Wear self-contained breathing apparatus and gloves to avoid inhalation, skin and eye contact. Provide sufficient ventilation.

Structural firefighters` protective clothing provides limited protection in fire situations ONLY; it is not effective in spill situations.

### Environmental Precautions

Prevent entry into drains, surface and ground water, soil and confined areas.

### Methods for Cleaning Up

Only trained, authorised personnel should be involved. Fully encapsulating protective clothing and self contained breathing apparatus should be worn for spills and leaks . Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Cover spills with dry sand, dry diatomaceous earth or dry salt followed with plastic sheet to minimise spreading. To avoid dust formation do not dry sweep. Do not vacuum. Collect material and place it into loosely covered plastic containers.

Place residues in a closed plastic container, suitably marked, and dispose of through a licensed waste disposal contractor.

## **7. HANDLING AND STORAGE**

### Precautions for safe handling

Handle in a fume cupboard or dedicated LEV room.

Avoid breathing dusts or contact with skin and eyes.

Do not get in eyes, on skin or on clothing. Do not ingest or inhale.

Wash or decontaminate after handling. Wash hands before eating. Discard contaminated shoes.

Keep container tightly closed.

See section 8 for personal protective equipment.

### Precautions for safe storage

Store in a tightly closed container. Store in a cool, dry, well-ventilated area away from incompatible substances (see section 10).

Specific use

Research

## 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

### Exposure limit values

Ingredient name	OES LTEL (8hr TWA)	OES STEL (15min)	MEL (LT)	MEL (ST)
Tungsten & compounds (as W)				
soluble	1mg/m <sup>3</sup>	3mg/m <sup>3</sup>		
insoluble	5mg/m <sup>3</sup>	10mg/m <sup>3</sup>		

### Occupational exposure controls

Eye protection	Wear appropriate protective eyeglasses, chemical safety goggles or full-face shield to European Standard EN 166.
Hand protection	Wear appropriate gloves. Gloves of nitrile or PVC may be used as single splash disposable gloves and must be discarded immediately after use. Gloves should comply with European Standard EN 374-3 class 3.
Skin protection	Use one or more of the following personal protection equipment as necessary. Full chemical protective suit to EN 465 standard, PVC apron, helmet and boots.
Respiratory protection	If product is not used in a fume cupboard or there is insufficient ventilation wear full face or hood compressed airline breathing apparatus to EN 139 or EN 270/271 alternatively use self contained breathing apparatus to EN 137. This equipment should always be available on standby.
Ingestion	Do not eat, drink or smoke when using this product. Do not ingest. Exhibit the strictest hygiene control.

Materials to avoid	Strong oxidizing agents. Alkali metals, halogens, interhalogens. Can react violently with chlorofluorine, lithium, chlorine.
Hazardous decomposition products	Metal oxide smoke.

## 11. TOXICOLOGICAL INFORMATION

A specific review on the clinical effects of individuals exposed to this agent has not yet been prepared. The following pertains to the general evaluation of individuals exposed to potentially toxic chemicals.

Effects from eye contact	Dusts or fume may cause eye irritation. Symptoms include redness and watering.	
Effects from skin contact	May cause skin irritation. No allergic reaction have been reported. There is a serious danger by skin resorption.	
Effects from inhalation	Irritating to respiratory system. Repeated exposure may cause lung damage and disorders such as bronchitis. Symptoms include difficulty in breathing, tightness in chest, cough, and dyspnea.	
Effects from ingestion	Ingestion may cause nausea, congestive failure, abdominal pain & vomiting.	
(a)	Acute toxicity (oral, inhalation, dermal) LD <sub>50</sub> 1059mg/kg (rat)	
(b)	Corrosivity/irritation (eye, skin, respiratory tract) Irritant for skin, eyes and mucous membranes	
(c)	Sensitisation (skin, respiratory) No sensitising effects known	
(d)	Repeated-dose toxicity	not tested/no data
(e)	Mutagenicity	not tested/no data
(f)	Carcinogenicity No classification data on carcinogenic properties of this material is available from the EPA, IARC, NTP, OSHA or ACGIH.	
(g)	Reproductive toxicity (fertility, developmental)	not tested/no data

## 12. ECOLOGICAL INFORMATION

(1) Ecotoxicity

(a) Aquatic toxicity

(i)	acute and chronic for fish	not tested/no data
(ii)	“ “ “ “ daphnia	not tested/no data
(iii)	“ “ “ “ algae	not tested/no data
(iv)	“ “ “ “ other aquatic plants	not tested/no data

(b) Soil toxicity

(i)	macro organisms	not tested/no data
(ii)	micro organisms	not tested/no data
(iii)	birds	not tested/no data
(iv)	bees	not tested/no data
(v)	plants	not tested/no data
(vi)	fauna	not tested/no data

Most tungsten compounds have low pressures at 25 deg C and are expected to exist solely in the particulate phase in the ambient atmosphere. Particulate-phase tungsten compounds may be removed from the air by wet and dry deposition.

Tungsten compounds are expected to exist as ions or insoluble solids in the environment and therefore volatilisation from moist soil and water surfaces is not expected to be an important fate process(SRC). Tungsten compounds are not expected to volatilise from dry soil surfaces based upon their ionic character and low vapour pressures(SRC).

(2) Mobility

see above

(3) Persistence and degradability

see above

(4) Bioaccumulation potential

No data available

(5) Other adverse effects

No other effects are known.

### 13. DISPOSAL CONSIDERATIONS

All waste material to be contained in a plastic sealed bin, duly marked, and disposed of as special waste through a licensed waste contractor in accordance with "The Special Waste Regulations 1996". See sections 6 and 7.

### 14. TRANSPORT INFORMATION

<u>Airfreight (IATA)</u>	<u>Seafreight (IMDG)</u>	<u>Road (ADR)</u>	<u>Rail (RID)</u>
(a) UN number		N/A	
(b) Class		N/A	
(c) Proper shipping name		N/A	
(d) Packing group		N/A	
(e) Marine pollutant (if applicable)		N/A	
(f) Other applicable information		N/A	

**Tungsten(VI)-oxide is not restricted for transport**

### 15. REGULATORY INFORMATION

EC Supply - Chip-3 regulations 2002, regulation 9

Xn Harmful  
Xi Irritant

Risk Phrases:

20/21/22: Harmful by inhalation, in contact with skin and if swallowed.  
36/37/38: Irritating to eyes, respiratory system and skin.

Safety Phrases:

26: In case of contact with eyes, rinse immediately with plenty of water and seek medical advice  
36/37/39: Wear suitable protective clothing, gloves and eye/face protection.

This material is subject to the COSHH regulations 2002. See COSHH Essentials for further information.

## 16. OTHER INFORMATION

### R Phrases Full Text:

20/21/22: Harmful by inhalation, in contact with skin and if swallowed.

36/37/38: Irritating to eyes, respiratory system and skin.

This material should only be handled by qualified, trained persons, fully familiar with its dangerous properties. During use or handling, a minimum of two persons should always be available.
